SUMMARY

Motivated and detail-oriented B.Tech IT graduate seeking an entry-level position in software development. Eager to apply Python and SQL programming skills, problem-solving abilities, and academic knowledge to build efficient and scalable backend applications while continuously learning new technologies.

EDUCATION

Bachelor of Technology in IT
JNT University Hyderabad(GNITC)
CGPA: 8.58

11/2022 – 06/2026
Hyderabad, Telangana

SKILLS

Programming Languages - Python - Java	Web Technologies - HTML - CSS - JavaScript	Databases - SQL - Mysql
Tools / Platforms - GitHub - VS Code - jupyter Notebook - Excel		

PROJECTS

- Fruit Stage Monitoring System**
Technologies: Python, Machine Learning, TensorFlow, Keras, OpenCV
 - Designed and developed a deep learning-based system using CNN architecture to accurately classify fruit ripeness into unripe, semi-ripe, and ripe categories
 - Enhanced model performance by applying advanced image preprocessing techniques and data augmentation, improving generalization across varied datasets
 - Achieved high classification accuracy while minimizing overfitting through optimized training and validation strategies
 - Optimized inference time to support near real-time predictions, making the system suitable for practical deployment scenarios to automate quality assessment, reducing manual effort in agricultural workflows
- Yolov10 Driven Enhanced Vehicle Detection in low light On-board Environment**
 - Technologies used: Python, OpenCV, YOLOv10, NumPy, PyTorch.
 - Led the development of a YOLOv10-based vehicle detection system focused on improving performance in low-light environments.
 - Trained and fine-tuned models on custom datasets for improved night-time accuracy
 - Integrated detection pipeline for efficient on-board, low-latency processing
 - Optimized detection performance by reducing false positives by ~15–20% and improving accuracy for small and partially occluded vehicles.
- Cloud Storage Data Integrity Auditing Using Identity-Based Systems**
 - Technologies used: Java, JDBC, Servlets, HTML, CSS, Java Script.
 - Designed and developed a secure auditing system to ensure integrity of cloud-stored data
 - Implemented identity-based cryptography to enable efficient, keyless public verification
 - Built scalable backend services using Core Java, Servlets, and JDBC with optimized database interactions
 - Reduced verification overhead and improved performance for large datasets through efficient auditing mechanisms
 - Strengthened data security by enabling tamper detection and preventing unauthorized data modifications

CERTIFICATIONS

- Tech Savishkaar 3.0 - Vasavi College of Engineering
- Certified By NPTEL in Programming in Python.

ACHIEVEMENTS

SAWIT.AI Learnathon-HCLTECH

Completed the SAWIT.AI Learnathon by HCLTech, gaining hands-on exposure to AI concepts and applications.

Internship-EDIGLOBE

- Successfully completed an Internship with EDIGLOBE.

Workshop on MEAN

VEI Technologies Pvt Ltd

- Participated in Two days Workshop on MEAN(Mongo, Express, Angular, Node) at VEI Technologies Pvt Ltd.

KEY STRENGTHS

- Strong problem-solving and analytical skills
- Good communication and teamwork abilities
- Interest in backend development and scalable systems
